Languages: Javascript/Typescript, Python
Frameworks: React JS/Next js, React Native, Flutter, Serverless
Databases: MySQL, Postgres, MongoDB, DynamoDb
DevOps: Docker, AWS
Other Technologies: Jira, Git, Wordpress, Google Analytics, Google Ads

Professional Experience

Senior Software Developer - Eqaim Technology And Services | 03/2023 - Present

• Early recognition: promoted to Senior after 4 months of leading successful projects.
• Led the technical execution, overseeing a diverse portfolio of projects including a sophisticated React Native based photo editing and submission app and a Flutter based image uploading app.
• Revamped the booking process for a Next js based coaching platform offering paid virtual & physical lessons to achieve a 30% booking surge and enhance user convenience.
• Exceeding client expectations with innovative POCs and MVPs built on serverless architecture for maximum scalability and cost efficiency

Fullstack Web Developer - Mu-zero Technologies | 01/2022 - 02/2023

• Expanded the capabilities of a MERN stack based school management platform (web & app) with robust fees payment and attendance management features.
• Contributed to both frontend (React/React Native) and backend (Node.js, Express, MongoDB) development ensuring seamless user experiences and efficient data management.

Freelance Web Developer - 02/2021 - 11/2021

• Successfully delivered 3+ high-performing websites for clients across industries.
• Expertise in building dynamic SPAs with the MERN stack, integrating secure payment gateways, and designing efficient databases (MySQL, PostgreSQL). Adept at collaborating with clients, translating their needs into engaging user experiences, and meeting deadlines consistently.
